We understand the importance of choosing the right product to limit your risk and exposure to dangerous viruses and bacteria. The EPA recommends using "an EPA-registered, hospital-grade disinfectant with an emerging viral pathogens claim for use against SARS-CoV-2", such as **Sani-Clean 2**. "If there are no available EPA-registered products with an approved viral pathogen claim, products with label claims against human coronavirus should be used in accordance with label instructions." Other Sunburst products containing the human coronavirus claim are No Bac and Quick San 10. The EPA strongly recommends following the use directions for enveloped viruses found on the label. Products available while supplies last. Visit the CDC website for additional information on prevention and control of COVID-19.
